Basic knowledge of backend technologies and RESTful APIs

PROJECTS

Portfolio Website : Developed a personal portfolio website showcasing frontend development projects and skills. Utilized HTML, CSS, and JavaScript to create a clean and responsive design.Implemented smooth animations to enhance user experience.(Try it here)

WeatherForecast Website : The WeatherForecast website is a user-friendly and interactive platform that provides accurate and up-to-date weather information for any location worldwide. Developed using HTML, CSS, and JavaScript, this project offers a seamless user experience to access essential weather data, including current temperature, minimum temperature, maximum temperature, and weather conditions like humidity, rain, etc.(Try it here)

Rock, Paper, Scissors Game Website : This is a simple and fun web-based game that allows users to play the classic game of Rock, Paper, Scissors against the computer. The game is designed to accept user input in the form of emojis representing Rock, Paper, or Scissors, and then generate a random output for the computer's choice. The game will then determine the winner based on the user's input and the computer's choice.(Try it here)
